Peachtree Orthopedic Clinic
Attention Dr. Ugwonali

October 26, 2015

Dear Dr. Ugwonali,

This is to acknowledge my deep appreciation and gratitude for your services rendered. I was in a car accident which caused injuries to both my rotator cuffs and my left knee. It was already a traumatic experience having to learn I had to undergo three surgeries to get the shoulders fixed .

I was skeptic and reserved with the ordeal I had to go through. Dr. Ugwonali was very friendly. He takes time to listen to his patients. I did not feel I was “ on the clock” with him to finish my consultation but rather it felt like a calm chat with my son or my brother. His calm demeanor helped cope with this stressful situation tremendously . Getting to know his impressive background and qualifications, his induction into the Surgical Institute of the Hand made the decision easy.

Rotator cuff tears never regenerate by themselves. If at all it stays the same or gets worse. I am a very active 61 year old man. I practice Karate Do, Aikido, weight training, play racquetball, yoga and pilates. Since the accident I felt “handicapped”, diminished, weak , incapable of doing things that before the accident were second nature hence getting both shoulders fixed became imperative. Since Dr. Ugwonali operated both my shoulders 08.27.15 and 10.29.15 I feel “ normal” . I am working diligently on my physical therapy exercises to gain my mobility and avoid getting re-injured.

I would recommend Peachtree Orthopedic to anybody especially Dr. Ugwonali. I gained a doctor, the best specialist I could ever have and , moreover , a friend. In eternal gratitude and utmost respect I remain

Truly yours

Georg Klein
